- Record precipitation in January and early February negatively impacted crushing and placement rates and diluted process solutions. While operations normalized in March, silver and gold production decreased quarter-over-quarter to 1.1 million ounces and 10,356 ounces, respectively, representing declines of 12% and 27%; year-over-year, silver production increased 21% and gold production was relatively unchanged, decreasing 1%
- Silver and gold sales increased 7% and 5%, respectively, to 1.3 million ounces and 13,592 ounces primarily due to a reduction in metal inventory; compared to the same period in 2016, silver and gold sales increased 19% and 16%, respectively
- Despite weather challenges, construction of the Stage IV leach pad expansion continues on schedule and on budget with commissioning expected in early 3Q 2017

Gold ounces sold	32,144	28,864	30,998	30,178	31,648

- As anticipated, Kensington's first quarter production decreased to 26,197 ounces of gold, representing declines of 22% quarter-over-quarter and 18% year-over-year. Production is expected to increase in the second and third quarters
- Lower grades and production were driven by mine sequencing; higher grades are expected for the remainder of 2017
- Gold sales increased 11% over the fourth quarter to 32,144 ounces due to a reduction of metal inventory; year-over-year, gold sales increased 2%
- Development of the Jualin decline remains on track for initial production later this year

- Gold production during the first quarter declined 32% to 20,873 ounces as a result of leach pad offload timing; compared to the first quarter of 2016, production was unchanged
- Gold sales decreased 19% quarter-over-quarter to 24,093 ounces due to lower production, which was partially offset by a decrease in metal inventory; year-over-year, sales increased 5%
- Remainder of high-grade Golden Reward deposit will be mined late in the second quarter through the third quarter, which is expected to result in a modest increase to third quarter production

San Bartolomé, Bolivia	1Q 2017	4Q 2016	3Q 2016	2Q 2016	1Q 2016

Silver ounces sold (000's)	1,148	1,218	1,391	1,418	1,384

- First quarter production decreased 3% to 1.2 million silver ounces as a result of persistent nationwide drought conditions; year-over-year, production declined 12%
- Mill grades declined during the quarter primarily due the mining of lower grade ore which requires less water to process
- Silver sales decreased 6% quarter-over-quarter and 17% year-over-year to 1.1 million ounces

Coeur Capital, Inc.

About Coeur

Coeur Mining is a well-diversified, growing precious metals producer with five precious metals mines in the Americas employing approximately 2,000 people. Coeur produces from its wholly-owned operations: the Palmarejo silver-gold complex in Mexico, the Rochester silver-gold mine in Nevada, the Kensington gold mine in Alaska, the Wharf gold mine in South Dakota, and the San Bartolomé silver mine in Bolivia. The Company also has a non-operating interest in the Endeavor mine in Australia. In addition, the Company owns the La Preciosa project in Mexico, a silver-gold exploration stage project. Coeur conducts exploration activities throughout North and South America.

Cautionary Statement

This news release contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding anticipated production, sales, operations at the Palmarejo complex, expansion at Rochester, grades and development efforts at Kensington, operations at Wharf, and production levels at the Endeavor mine. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that anticipated production levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities

regulators, including, without limitation, Coeur's most recent report on Form 10-K. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, approved the scientific and technical information concerning Coeur's mineral projects in this news release. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should refer to the Technical Reports for each of Coeur's properties as filed on SEDAR at sedar.com.
